

Building Shit University Web Template

Welcome to the WCAP Workshop Final Project by Tofus Wang. We're about to embark on a journey to simplify web design for the g0v community.

Presenter: Tofus Wang

The Problem We're Solving

The Challenge

Many g0v community members lack basic coding skills. They struggle to create webpages, unsure about essential elements.

Our Solution

We're providing a simple landing page template. It'll help members quickly grasp basic webpage structures, reducing design complexity and costs.

Design Concept: Keep It Simple

Intuitive Layout

Focus on essential elements:
header, content sections, and
CTA.

Clear Structure

Logical flow from top to bottom,
guiding users through
information.

Minimalist Approach

Clean design without unnecessary clutter or complexity.

Website Preview: Key Sections

Header

Eye-catching site title and concise tagline to grab attention. With playful video created with Sora

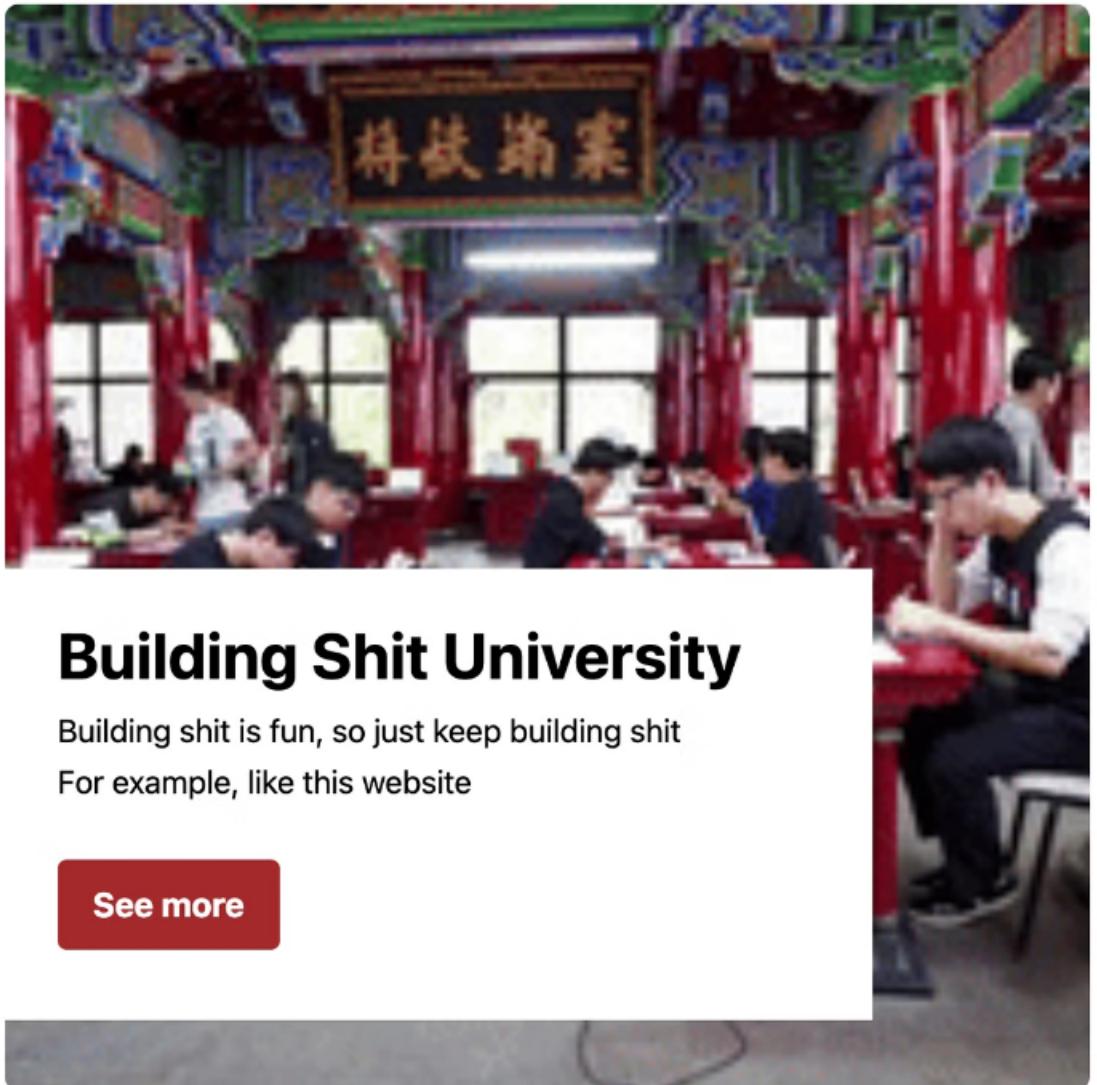

Content Sections

About, features, and resources presented in a clear, scannable format.

CTA

Prominent call-to-action buttons guiding user engagement.

Building Shit University

Building shit is fun, so just keep building shit
For example, like this website

About

Building Shit University is a university dedicated to encouraging students to build shit. We believe that kids in this generation don't enjoy learning from adults' opinions and suggestions.

As the most radical institution on the planet, we've chosen not to hire any teachers on campus. Instead, we provide a wealth of learning resources designed to help you learn—especially to help you build shit by yourself.

Learning resources from diverse open-source communities

We've curated the best open-source tools, guides, and tutorials to empower you (like g0v). Everything you need to start building is at your fingertips.

g0v Civic Tech Tutorial Playlist

Highlights and Applications

Responsive Design

Adapts seamlessly to different screen sizes, from mobile to desktop.

Clear Structure

Intuitive layout that guides users through content effortlessly.

Open-Source Integration

Incorporates g0v-inspired resources for community alignment.

Versatile Use

Perfect for personal sites, event pages, and project showcases.

Future Improvements and Plans

1 Template Variations

Create diverse styles to suit different project needs.

2 Enhanced Customization

Offer more options for personalization without complexity.

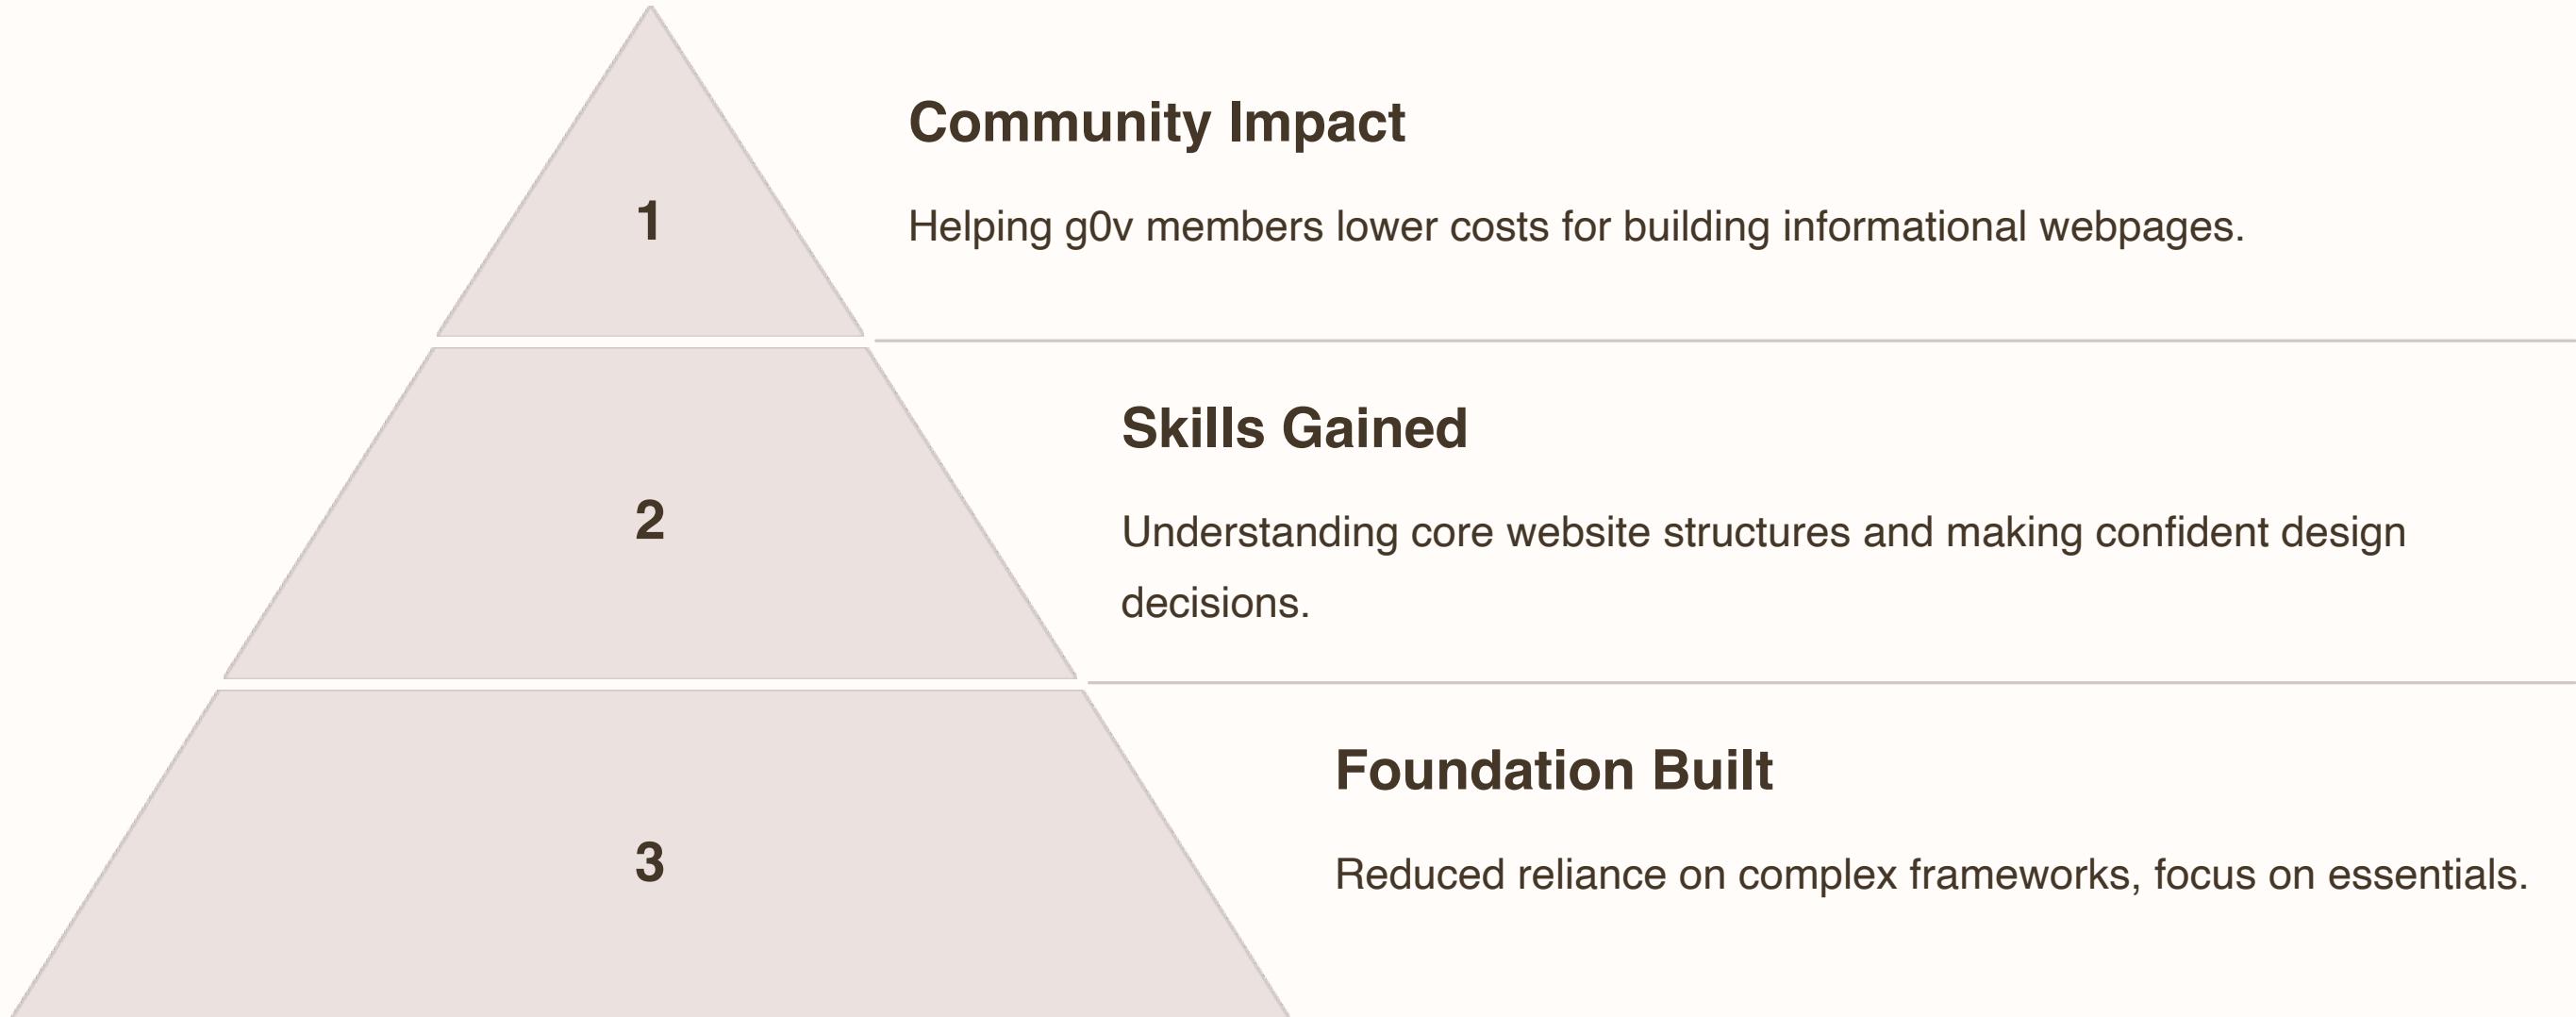

3 Accessibility Boost

Ensure the template is usable by all, regardless of abilities.

4 Community Adoption

Promote template use across various g0v projects. Especially projects that lack of assistance from engineers.

Reflections on WCAP Training

Thank You and Next Steps
